

Pending Claims
Application No. 09/733,897
Attorney Docket No.: 05725.0809-00000
Filed: December 12, 2000

1. (Withdrawn) A composition comprising at least one liquid fatty phase which comprises:
 - (i) at least one structuring polymer comprising:
a polymer skeleton which comprises at least one hydrocarbon-based repeating unit comprising at least one hetero atom;
 - (ii) at least one oil-soluble ester comprising at least one free hydroxy group; and
 - (iii) at least one oil-soluble cationic surfactant.
2. (Original) A composition comprising at least one liquid fatty phase which comprises:
 - (i) at least one structuring polymer comprising:
a polymer skeleton which comprises at least one hydrocarbon-based repeating unit comprising at least one hetero atom;
 - (ii) at least one oil-soluble ester comprising at least one free hydroxy group; and
 - (iii) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.
3. (Withdrawn) A composition comprising at least one liquid fatty phase which comprises:
 - (i) at least one structuring polymer comprising:
a polymer skeleton which comprises at least one hydrocarbon-based repeating unit comprising at least one hetero atom;
 - (ii) at least one oil-soluble cationic surfactant; and
 - (iii) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.
4. (Withdrawn) A composition comprising at least one liquid fatty phase which comprises:
 - (i) at least one structuring polymer, wherein said at least one structuring polymer is at least one polyamide polymer comprising:

- a polymer skeleton which comprises at least one amide repeating unit;
- (ii) at least one oil-soluble ester comprising at least one free hydroxy group; and
- (iii) at least one oil-soluble cationic surfactant.

5. (Original) A composition comprising at least one liquid fatty phase which comprises:

(i) at least one structuring polymer, wherein said at least one structuring polymer is at least one polyamide polymer comprising:

- a polymer skeleton which comprises at least one amide repeating unit;
- (ii) at least one oil-soluble ester comprising at least one free hydroxy group; and
- (iii) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.

6. (Withdrawn) A composition comprising at least one liquid fatty phase which comprises:

(i) at least one structuring polymer, wherein said at least one structuring polymer is at least one polyamide polymer comprising:

- a polymer skeleton which comprises at least one amide repeating unit;
- (ii) at least one oil-soluble cationic surfactant; and
- (iii) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.

7. (Withdrawn) An anhydrous composition comprising at least one liquid fatty phase which comprises:

(i) at least one structuring polymer comprising:

a polymer skeleton which comprises at least one hydrocarbon-based repeating unit comprising at least one hetero atom;

- (ii) at least one oil-soluble ester comprising at least one free hydroxy group; and
- (iii) at least one oil-soluble cationic surfactant.

8. (Original) An anhydrous composition comprising at least one liquid fatty phase which comprises:

(i) at least one structuring polymer comprising:

a polymer skeleton which comprises at least one hydrocarbon-based repeating unit comprising at least one hetero atom;

(ii) at least one oil-soluble ester comprising at least one free hydroxy group; and
(iii) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.

9. (Withdrawn) An anhydrous composition comprising at least one liquid fatty phase which comprises:

(i) at least one structuring polymer comprising:
a polymer skeleton which comprises at least one hydrocarbon-based repeating unit comprising at least one hetero atom;
(ii) at least one oil-soluble cationic surfactant; and
(iii) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.

10. (Cancelled)

11. (Original) A mascara, an eyeliner, a foundation, a lipstick, a make-up-removing product, a make-up product for the body, a nail composition, an eyeshadow, a face powder, a concealer product, a shampoo, a conditioner, an antisun product or a care product for the lips, hair or nails comprising a composition comprising at least one liquid fatty phase in said mascara, eyeliner, foundation, lipstick, blusher, make-up-removing product, make-up product for the body, nail composition, eyeshadow, face powder, concealer product, shampoo, conditioner, antisun product or care product for the lips, hair or nails which comprises:

(i) at least one structuring polymer comprising:
a polymer skeleton which comprises at least one hydrocarbon-based repeating unit comprising at least one hetero atom; and
(ii) at least two components chosen from:
(a) at least one oil-soluble ester comprising at least one free hydroxy group;
(b) at least one oil-soluble cationic surfactant; and
(c) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.

12. (Original) A deodorant product or a care product for the skin, lips, or body comprising a composition comprising at least one liquid fatty phase in said product which comprises:

- (i) at least one structuring polymer comprising:
 - a polymer skeleton which comprises at least one hydrocarbon-based repeating unit comprising at least one hetero atom; and
- (ii) at least two components chosen from:
 - (a) at least one oil-soluble ester comprising at least one free hydroxy group;
 - (b) at least one oil-soluble cationic surfactant; and
 - (c) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.

13. (Cancelled)

14. (Original) A care and/or treatment and/or make-up composition for keratinous fibers, lips or skin comprising at least one liquid fatty phase in said care and/or treatment and/or make-up composition for keratinous fibers, lips or skin which comprises:

- (i) at least one structuring polymer comprising:
 - a polymer skeleton which comprises at least one hydrocarbon-based repeating unit comprising at least one hetero atom; and
- (ii) at least two components chosen from:
 - (a) at least one oil-soluble ester comprising at least one free hydroxy group;
 - (b) at least one oil-soluble cationic surfactant; and
 - (c) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.

15. (Original) A lipstick composition in stick form comprising (i) at least one continuous liquid fatty phase, (ii) at least two components chosen from:

- (a) at least one oil-soluble ester comprising at least one free hydroxy group;
- (b) at least one oil-soluble cationic surfactant; and
- (c) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums, and (iii) at least one non-waxy structuring polymer having a weight-average molecular mass of less than 100 000 in said lipstick composition, said continuous liquid fatty phase, said at least two components, and said at least one non-waxy structuring polymer being present in said lipstick composition.

16. (Original) An eyeshadow composition comprising at least one liquid fatty phase in said eyeshadow composition which comprises:

(i) at least one structuring polymer comprising:

a polymer skeleton which comprises at least one hydrocarbon-based repeating unit comprising at least one hetero atom; and

(ii) at least two components chosen from:

(a) at least one oil-soluble ester comprising at least one free hydroxy group;

(b) at least one oil-soluble cationic surfactant; and

(c) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.

17. (Original) A lipstick composition comprising at least one liquid fatty phase in said lipstick composition which comprises:

(i) at least one structuring polymer comprising:

a polymer skeleton which comprises at least one hydrocarbon-based repeating unit comprising at least one hetero atom; and

(ii) at least two components chosen from:

(a) at least one oil-soluble ester comprising at least one free hydroxy group;

(b) at least one oil-soluble cationic surfactant; and

(c) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.

18. (Original) A foundation composition comprising at least one liquid fatty phase in said foundation composition which comprises:

(i) at least one structuring polymer comprising:

a polymer skeleton which comprises at least one hydrocarbon-based repeating unit comprising at least one hetero atom; and

(ii) at least two components chosen from:

(a) at least one oil-soluble ester comprising at least one free hydroxy group;

(b) at least one oil-soluble cationic surfactant; and

(c) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.

19. (Withdrawn) A method for care, make-up or treatment of keratinous fibers, lips, or skin comprising applying to said keratinous fibers, lips, or skin a composition comprising at least one liquid fatty phase which comprises:

(i) at least one structuring polymer comprising:

a polymer skeleton which comprises at least one hydrocarbon-based repeating unit comprising at least one hetero atom; and

(ii) at least two components chosen from:

(a) at least one oil-soluble ester comprising at least one free hydroxy group;

(b) at least one oil-soluble cationic surfactant; and

(c) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.

20. (Withdrawn) A method for providing an anhydrous composition having at least one property chosen from a solid appearance, non-exudation, shear-strength, gloss, and comfortable deposit on keratin materials chosen from lips, skin, and keratinous fibers, comprising including in said composition at least one liquid fatty phase which comprises:

(i) at least one structuring polymer comprising:

a polymer skeleton which comprises at least one hydrocarbon-based repeating unit comprising at least one hetero atom; and

(ii) at least two components chosen from:

(a) at least one oil-soluble ester comprising at least one free hydroxy group;

(b) at least one oil-soluble cationic surfactant; and

(c) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.

21. (Original) A structured composition comprising at least one liquid fatty phase structured with at least one structuring polymer comprising a polymer skeleton comprising at least one hydrocarbon-based repeating unit comprising at least one hetero atom, wherein the at least one structuring polymer further comprises at least one chain chosen from

(i) terminal fatty chains, optionally functionalized, chosen from alkyl and alkenyl chains, bonded to the polymer skeleton via at least one linking group chosen from amides, ureas, and esters, and

(ii) pendant fatty chains, optionally functionalized, chosen from alkyl and alkenyl chains, bonded to the polymer skeleton via at least one linking group chosen from amides, ureas, and esters,

wherein when said at least one linking group is chosen from esters, said at least one terminal fatty chain is chosen from branched alkyl groups, and

further comprising at least two components chosen from:

(a) at least one oil-soluble ester comprising at least one free hydroxy group;

(b) at least one oil-soluble cationic surfactant; and

(c) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.

22. (Previously presented) A make-up or care or treatment composition for the skin, the lips, or keratinous fibers comprising a structured composition comprising at least one liquid fatty phase structured with at least one structuring polymer comprising a polymer skeleton comprising at least one hydrocarbon-based repeating unit comprising at least one hetero atom, at least two components chosen from:

(a) at least one oil-soluble ester comprising at least one free hydroxy group;

(b) at least one oil-soluble cationic surfactant; and

(c) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums, and

wherein said make-up or care or treatment composition further comprises at least one coloring agent.

23. (Withdrawn) A method of making up or caring for skin, lips, or keratinous fibers comprising applying to said skin, lips, or keratinous fibers a structured composition comprising at least one liquid fatty phase structured with at least one structuring polymer comprising a polymer skeleton comprising at least one hydrocarbon-based repeating unit comprising at least one hetero atom, and

at least two components chosen from:

(a) at least one oil-soluble ester comprising at least one free hydroxy group;

(b) at least one oil-soluble cationic surfactant; and
 (c) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.

24. (Original) A anhydrous composition comprising at least one liquid fatty phase which comprises:

(i) at least one structuring polymer comprising:
 a polymer skeleton which comprises at least one hydrocarbon-based repeating unit comprising at least one hetero atom; and
 (ii) at least two components chosen from:
 (a) at least one oil-soluble ester comprising at least one free hydroxy group;
 (b) at least one oil-soluble cationic surfactant; and
 (c) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.

25. (Original) An anhydrous composition according to claim 24, wherein said at least three hydrocarbon-based repeating units are identical.

26. (Withdrawn) A composition comprising at least one liquid fatty phase which comprises:

(i) at least one structuring polymer chosen from urea-urethanes having the following formula:

wherein R represents $\text{C}_n\text{H}_{2n+1}-$, wherein n represents an integer having a value greater than 22 or $\text{C}_m\text{H}_{2m+1}(\text{OC}_p\text{H}_{2p})_r-$, wherein m represents an integer having a value of greater than 18, p represents an integer having a value of from 2 to 4, and r represents an integer having a value of from 1 to 10.

R' represents:

and R" represents:

; and

(ii) at least two components chosen from:

(a) at least one oil-soluble ester comprising at least one free hydroxy group;

(b) at least one oil-soluble cationic surfactant; and

(c) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.

27. (Withdrawn) A composition comprising at least one liquid fatty phase which comprises:

(i) at least one structuring polymer comprising

a polymer skeleton which comprises at least one hydrocarbon-based repeating unit comprising at least one hetero atom with the proviso that said at least one hetero atom is not nitrogen; and

(ii) at least two components chosen from:

(a) at least one oil-soluble ester comprising at least one free hydroxy group;

(b) at least one oil-soluble cationic surfactant; and

(c) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.

28. (Original) A composition comprising at least one liquid fatty phase which comprises:

(i) at least one structuring polymer comprising: a polymer skeleton which comprises a) at least one hydrocarbon-based repeating unit comprising at least one hetero atom and b) at least one of:

- at least one terminal fatty chain, optionally functionalized, chosen from alkyl chains and alkenyl chains, wherein said at least one terminal fatty chain is bonded to said polymer skeleton via at least one linking group; and

- at least one pendant fatty chain, optionally functionalized, chosen from alkyl chains and alkenyl chains, wherein said at least one pendant fatty chain is bonded to said polymer skeleton via at least one linking group; and

(ii) at least two components chosen from:

(a) at least one oil-soluble ester comprising at least one free hydroxy group;

(b) at least one oil-soluble cationic surfactant; and

(c) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.

29. (Original) A make-up composition in stick form comprising at least one continuous liquid fatty phase, at least two components chosen from:

(a) at least one oil-soluble ester comprising at least one free hydroxy group;

(b) at least one oil-soluble cationic surfactant; and

(c) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums, and at least one non-waxy structuring polymer having a weight-average molecular mass of less than 100, 000.

30. (Withdrawn) A method for care, make-up or treatment of keratin materials comprising applying to said keratin materials a composition comprising at least one liquid fatty phase which comprises:

(i) at least one structuring polymer comprising:

a polymer skeleton which comprises at least one hydrocarbon-based repeating unit comprising at least one hetero atom; and

(ii) at least two components chosen from:

(a) at least one oil-soluble ester comprising at least one free hydroxy group;

(b) at least one oil-soluble cationic surfactant; and

(c) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.

31. (Withdrawn) A method for care, make-up or treatment of keratin fibers comprising applying to said keratin fibers a composition comprising at least one liquid fatty phase which comprises:

(i) at least one structuring polymer comprising:

a polymer skeleton which comprises at least one hydrocarbon-based repeating unit comprising at least one hetero atom; and

(ii) at least two components chosen from:

(a) at least one oil-soluble ester comprising at least one free hydroxy group;

(b) at least one oil-soluble cationic surfactant; and

(c) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.

32. (Withdrawn) A method for increasing at least one of the hardness of a composition, its shear strength and its heat resistance, comprising including in said composition at least one liquid fatty phase which comprises:

(i) at least one structuring polymer comprising:

a polymer skeleton which comprises at least one hydrocarbon-based repeating unit comprising at least one hetero atom; and

(ii) at least two components chosen from:

(a) at least one oil-soluble ester comprising at least one free hydroxy group;

(b) at least one oil-soluble cationic surfactant; and

(c) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.

33. (Withdrawn) A method for making a physiologically acceptable cosmetic composition comprising including in a cosmetic composition at least one liquid fatty phase which comprises:

(i) at least one structuring polymer comprising:

a polymer skeleton which comprises at least one hydrocarbon-based repeating unit comprising at least one hetero atom, wherein said at least one structuring polymer further optionally comprises at least one of:

at least one terminal fatty chain comprising 8 to 120 carbon atoms, wherein said at least one terminal fatty chain is bonded to said polymer skeleton via at least one linking group; and

at least one pendant fatty chain comprising 8 to 120 carbon atoms, wherein said at least one pendant fatty chain is bonded to any carbon or hetero atom of said polymer skeleton via at least one linking group; and

(ii) at least two components chosen from:

(a) at least one oil-soluble ester comprising at least one free hydroxy group;

(b) at least one oil-soluble cationic surfactant; and

(c) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.

34. (Original) A structured composition comprising at least one liquid fatty phase structured with at least one structuring polymer comprising a polymer skeleton comprising at least one hydrocarbon-based repeating unit comprising at least one hetero atom, wherein the at least one structuring polymer further comprises at least one of: terminal and pendant fatty chains, optionally functionalized, said terminal and pendant fatty chains comprising at least one chain chosen from alkyl and alkenyl chains, bonded to the polymer skeleton via at least one linking group chosen from amides, ureas, and esters, wherein when said at least one linking group is chosen from esters, said terminal fatty chains are chosen from branched alkyl groups, wherein said at least one liquid fatty phase also comprises at least two components chosen from:

(a) at least one oil-soluble ester comprising at least one free hydroxy group;

(b) at least one oil-soluble cationic surfactant; and

(c) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.

35. (Original) A structured anhydrous composition comprising at least one liquid fatty phase structured with at least one structuring polymer comprising a polymer skeleton comprising at least one hydrocarbon-based repeating unit comprising at least

one hetero atom, wherein the at least one structuring polymer further comprises at least one of: terminal and pendant fatty chains, optionally functionalized, said terminal and pendant fatty chains comprising at least one chain chosen from alkyl and alkenyl chains, bonded to the polymer skeleton via at least one linking group chosen from amides, ureas, and esters, wherein when said at least one linking group is chosen from esters, said terminal fatty chains are chosen from branched alkyl groups, wherein said at least one liquid fatty phase also comprises at least two components chosen from:

- (a) at least one oil-soluble ester comprising at least one free hydroxy group;
- (b) at least one oil-soluble cationic surfactant; and
- (c) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated

guar gums.

36. (Cancelled)

37. (Cancelled)

38. (Withdrawn) A method of making up or caring for skin, lips or keratinous fibers comprising applying to said skin or keratinous fibers a structured composition containing at least one liquid fatty phase structured with at least one structuring polymer comprising a polymer skeleton comprising at least one hydrocarbon-based repeating unit comprising at least one hetero atom and at least two components chosen from:

- (a) at least one oil-soluble ester comprising at least one free hydroxy group;
- (b) at least one oil-soluble cationic surfactant; and
- (c) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated

guar gums.

39. (Original) A composition comprising at least one liquid fatty phase in said composition which comprises:

- (i) at least one structuring polymer comprising:
a polymer skeleton which comprises at least three hydrocarbon-based repeating units comprising at least one hetero atom; and
- (ii) at least two components chosen from:
 - (a) at least one oil-soluble ester comprising at least one free hydroxy group;
 - (b) at least one oil-soluble cationic surfactant; and

(c) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.

40. (Withdrawn) A composition comprising at least one liquid fatty phase in said composition which comprises:

(i) at least one structuring polymer chosen from urea-urethanes having the following formula:

wherein R represents $C_nH_{2n+1}-$, wherein n represents an integer having a value greater than 22 or $C_mH_{2m+1}(OC_pH_{2p})_r-$, wherein m represents an integer having a value of greater than 18, p represents an integer having a value of from 2 to 4, and r represents an integer having a value of from 1 to 10.

R' represents:

and R'' represents:

; and

(ii) at least two components chosen from:

- (a) at least one oil-soluble ester comprising at least one free hydroxy group;
- (b) at least one oil-soluble cationic surfactant; and
- (c) at least one oil-soluble polymer chosen from alkyl celluloses and alkylated guar gums.

41. (Withdrawn) The composition according to claim 1, wherein said at least one structuring polymer further comprises at least one of:

at least one terminal fatty chain chosen from alkyl chains and alkenyl chains, wherein said at least one terminal fatty chain is bonded to said polymer skeleton via at least one linking group; and

at least one pendant fatty chain chosen from alkyl chains and alkenyl chains, wherein said at least one pendant fatty chain is bonded to said polymer skeleton via at least one linking group.

42. (Withdrawn) The composition according to claim 41, wherein said alkyl chains and said alkenyl chains each comprise at least four carbon atoms.

43. (Withdrawn) The composition according to claim 41, wherein said at least one linking group is chosen from single bonds and urea, urethane, thiourea, thiourethane, thioether, thioester, ester, ether, and amine groups.

44. (Withdrawn) The composition according to claim 43, wherein said at least one linking group is an ester group present in a proportion ranging from 15% to 40% of the total number of all ester and hetero atom groups in the at least one structuring polymer.

45. (Withdrawn) The composition according to claim 41, wherein said at least one terminal fatty chain is functionalized.

46. (Withdrawn) The composition according to claim 41, wherein said at least one pendant fatty chain is functionalized.

47. (Withdrawn) The composition according to claim 41, wherein in said at least one structuring polymer, the percentage of the total number of fatty chains ranges from 40% to 98% relative to the total number of all repeating units and fatty chains in the at least one structuring polymer.

48. (Withdrawn) The composition according to claim 1, wherein said at least one structuring polymer has a weight-average molecular mass of less than 100,000.

49. (Withdrawn) The composition according to claim 1, wherein said at least one hydrocarbon-based repeating unit comprises from 2 to 80 carbon atoms.

50. (Withdrawn) The composition according to claim 1, wherein said at least one hetero atom of said at least one hydrocarbon-based repeating unit is chosen from nitrogen, sulfur, and phosphorus.

51. (Withdrawn) The composition according to claim 1, wherein said at least one hetero atom is combined with at least one atom chosen from oxygen and carbon to form a hetero atom group.

52. (Withdrawn) The composition according to claim 51, wherein said at least one hetero atom group is chosen from amide groups, carbamate groups, and urea groups.

53. (Withdrawn) The composition according to claim 1, wherein said at least one structuring polymer is chosen from polyamide polymers of formula (I):

in which:

- n is an integer which represents the number of amide units such that the number of ester groups present in said at least one polyamide polymer ranges from 10% to 50% of the total number of all ester groups and all amide groups comprised in said at least one polyamide polymer;
- R¹, which are identical or different, are each chosen from alkyl groups comprising at least 4 carbon atoms and alkenyl groups comprising at least 4 carbon atoms;
- R², which are identical or different, are each chosen from C₄ to C₄₂ hydrocarbon-based groups with the proviso that at least 50% of all R² are chosen from C₃₀ to C₄₂ hydrocarbon-based groups;
- R³, which are identical or different, are each chosen from organic groups comprising atoms chosen from carbon atoms, hydrogen atoms, oxygen atoms, and nitrogen atoms, with the proviso that R³ comprises at least 2 carbon atoms; and
- R⁴, which are identical or different, are each chosen from hydrogen atoms, C₁ to C₁₀ alkyl groups and a direct bond to at least one group chosen from R³ and another R⁴ such that when said at least one group is chosen from another R⁴, the nitrogen atom to which both R³ and R⁴ are bonded forms part of a heterocyclic structure defined in part by R⁴-N-R³, with the proviso that at least 50% of all R⁴ are chosen from hydrogen atoms.

54. (Withdrawn) The composition according to claim 1, wherein said at least one structuring polymer has a softening point greater than 50°C.

55. (Withdrawn) The composition according to claim 1, wherein said at least one structuring polymer is present in the composition in an amount ranging from 0.5% to 80% by weight relative to the total weight of the composition.

56. (Withdrawn) The composition according to claim 55, wherein said at least one structuring polymer is present in the composition in an amount ranging from 2% to 60% by weight relative to the total weight of the composition.

57. (Withdrawn) The composition according to claim 56, wherein said at least one structuring polymer is present in the composition in an amount ranging from 5% to 40% by weight relative to the total weight of the composition.

58. (Withdrawn) The composition according to claim 1, wherein said composition has a hardness ranging from 30 to 300 g.

59. (Withdrawn) The composition according to claim 1, wherein said at least one liquid fatty phase further comprises at least one oil.

60. (Withdrawn) The composition according to claim 1, wherein said at least one liquid fatty phase further comprises at least one non-volatile oil.

61. (Withdrawn) The composition according to claim 60, wherein said at least one non-volatile oil is chosen from hydrocarbon-based oils of mineral, plant, and synthetic origin, synthetic esters and ethers, and silicone oils.

62. (Withdrawn) The composition according to claim 1, wherein said at least one liquid fatty phase is present in an amount ranging from 1% to 99% by weight relative to the total weight of the composition.

63. (Withdrawn) The composition according to claim 1, wherein said at least one liquid fatty phase further comprises at least one volatile solvent chosen from hydrocarbon-based solvents and silicone solvents optionally comprising alkyl or alkoxy groups that are pendant or at the end of a silicone chain.

64. (Withdrawn) The composition according to claim 63, wherein said at least one volatile solvent is present in an amount up to 95.5% relative to the total weight of the composition.

65. (Withdrawn) The composition according to claim 1, wherein the at least one oil-soluble ester comprising at least one free hydroxy group is not castor oil.

66. (Withdrawn) The composition according to claim 1, wherein said at least one oil-soluble ester is chosen from propylene glycol ricinoleate, isopropyl hydroxystearate, tri-isocetyl citrate, di-isostearyl malate, octyl hydroxystearate, tri-isoarachidyl citrate, cetyl lactate, dioctyl malate, octyldodecyl hydroxystearate, di-isostearyl malate, and di-isostearyl lactate.

67. (Withdrawn) The composition according to claim 66, wherein said at least one oil-soluble ester is di-isostearyl malate.

68. (Withdrawn) The composition according to claim 1, wherein the at least one oil-soluble ester comprising at least one free hydroxyl group is present in a concentration ranging from 10% to 84% by weight, relative to the weight of the composition.

69. (Withdrawn) The composition according to claim 1, wherein said at least one oil-soluble cationic surfactant is chosen from quaternary ammonium compounds and fatty amines.

70. (Withdrawn) The composition according to claim 69, wherein said quaternary ammonium compounds are chosen from salts of quaternary ammonium compounds.

71. (Withdrawn) The composition according to claim 69, wherein said fatty amines are chosen from salts of fatty amines.

72. (Withdrawn) The composition according to claim 69, wherein said quaternary ammonium compounds are chosen from quaternary ammonium salts of the formula

wherein R_1 , R_2 , R_3 , and R_4 are each independently chosen from an aliphatic group of from 1 to 22 carbon atoms, C_1 - C_3 alkyls, hydroxyalkyls, polyalkoxys, aromatic groups having from 12 to 22 carbon atoms, aryl groups having from 12 to 22 carbon

atoms, and alkylaryl groups having from 12 to 22 carbon atoms; and X is chosen from halogen, acetate, phosphate, nitrate, and alkylsulfate radicals.

73. (Withdrawn) The composition according to claim 69, wherein said quaternary ammonium compounds are chosen from quaternary ammonium salts of the formula

wherein R₁ is an aliphatic group having from 16 to 22 carbon atoms; R₂, R₃, R₄, R₅, and R₆ are independently chosen from hydrogen and alkyl having from 1 to 4 carbon atoms; and X is chosen from halogens, acetates, phosphates, nitrates, and alkyl sulfate radicals.

74. (Withdrawn) The composition according to claim 69, wherein said fatty amines comprise alkyl groups having from 12 to 22 carbon atoms.

75. (Withdrawn) The composition according to claim 69, wherein said fatty amines are chosen from stearamido propyl dimethyl amine, diethyl amino ethyl stearamide, dimethyl stearamine, dimethyl soyamine, soyamine, tridecyl amine, ethyl stearylamine, ethoxylated stearylamine, dihydroxyethyl stearylamine, and arachidylbehenylamine.

76. (Withdrawn) The composition according to claim 71, wherein said salts of fatty amines are chosen from halogens, acetates, phosphates, nitrates, citrates, lactates, and alkyl sulfates.

77. (Withdrawn) The composition according to claim 69, wherein said quaternary ammonium compounds are chosen from 1-methyl-1-[(stearoylamide)ethyl]-2-heptadecyl-4,5-dihydroimidazolinium chloride, 1-methyl-1-[(palmitoylamide)ethyl]-2-octadecyl-4,5-dihydroimidazolinium chloride, and 1-methyl-1-[(tallowamide)-ethyl]-2-tallow-imidazolinium methyl sulfate.

78. (Withdrawn) The composition according to claim 1, wherein said at least one oil-soluble cationic surfactant is lauryl methyl gluceth-10-hydroxypropyl dimmonium chloride.

79. (Withdrawn) The composition according to claim 1, wherein said at least one oil-soluble cationic surfactant is present in an amount ranging from 0.1% to 10% by weight of the total weight of said composition.

80. (Withdrawn) The composition according to claim 1, wherein the composition is in a form chosen from a fluid gel, rigid gel, fluid simple emulsion, rigid simple emulsion, fluid multiple emulsion, and rigid multiple emulsion.

81. (Withdrawn) The composition according to claim 1, wherein said composition is a solid.

82. (Withdrawn) The composition according to claim 1, further comprising at least one fatty alcohol.

83. (Withdrawn) The composition according to claim 82, wherein said at least one fatty alcohol is chosen from C₈ to C₂₆ fatty alcohols.

84. (Withdrawn) The composition according to claim 82, wherein the at least one fatty alcohol is present in a concentration ranging from 0.1% to 15.0% by weight, relative to the weight of the composition.

85. (Withdrawn) The composition according to claim 1, wherein said composition further comprises at least one additional fatty material.

86. (Withdrawn) The composition according to claim 1, wherein said composition further comprises castor oil.

87. (Withdrawn) The composition according to claim 1, further comprising at least one gum.

88. (Withdrawn) The composition according to claim 1, further comprising at least one wax.

89. (Withdrawn) The composition according to claim 88, wherein said at least one wax is present at a concentration of up to 3% relative to the total weight of said composition.

90. (Withdrawn) The composition according to claim 1, further comprising at least one oil-soluble polymer.

91. (Withdrawn) The composition according to claim 90, wherein said at least one oil-soluble polymer is chosen from alkylated guar gums and alkyl celluloses.

92. (Withdrawn) The composition according to claim 90, wherein the at least one oil-soluble polymer is present in a concentration ranging from 0.05% to 10% by weight, relative to the weight of the composition.

93. (Withdrawn) The composition according to claim 4, wherein said at least one polyamide polymer further comprises at least one of:

at least one terminal fatty chain chosen from alkyl chains and alkenyl chains, wherein said at least one terminal fatty chain is bonded to said polymer skeleton via at least one linking group; and

at least one pendant fatty chain chosen from alkyl chains and alkenyl chains, wherein said at least one pendant fatty chain is bonded to said polymer skeleton via at least one linking group.

94. (Withdrawn) The composition according to claim 4, wherein said at least one polyamide polymer has a weight-average molecular mass of less than 100,000.

95. (Withdrawn) The composition according to claim 4, wherein said at least one polyamide polymer is chosen from polyamide polymers of formula (I):

in which:

- n is an integer which represents the number of amide units such that the number of ester groups present in said at least one polyamide polymer ranges from 10% to 50% of the total number of all ester groups and all amide groups comprised in said at least one polyamide polymer;

- R¹, which are identical or different, are each chosen from alkyl groups comprising at least 4 carbon atoms and alkenyl groups comprising at least 4 carbon atoms;

- R^2 , which are identical or different, are each chosen from C_4 to C_{42} hydrocarbon-based groups with the proviso that at least 50% of all R^2 are chosen from C_{30} to C_{42} hydrocarbon-based groups;

- R^3 , which are identical or different, are each chosen from organic groups comprising atoms chosen from carbon atoms, hydrogen atoms, oxygen atoms, and nitrogen atoms, with the proviso that R^3 comprises at least 2 carbon atoms; and

- R^4 , which are identical or different, are each chosen from hydrogen atoms, C_1 to C_{10} alkyl groups and a direct bond to at least one group chosen from R^3 and another R^4 such that when said at least one group is chosen from another R^4 , the nitrogen atom to which both R^3 and R^4 are bonded forms part of a heterocyclic structure defined in part by R^4-N-R^3 , with the proviso that at least 50% of all R^4 are chosen from hydrogen atoms.

96. (Withdrawn) The composition according to claim 4, wherein said at least one polyamide polymer has a softening point greater than 50°C.

97. (Withdrawn) The composition according to claim 4, wherein said at least one polyamide polymer is present in the composition in an amount ranging from 0.5% to 80% by weight relative to the total weight of the composition.

98. (Withdrawn) The composition according to claim 4, wherein said composition has a hardness ranging from 30 to 300 g.

99. (Withdrawn) The composition according to claim 4, wherein said at least one liquid fatty phase further comprises at least one oil.

100. (Withdrawn) The composition according to claim 4, wherein said at least one liquid fatty phase is present in an amount ranging from 1% to 99% by weight relative to the total weight of the composition.

101. (Withdrawn) The composition according to claim 4, wherein said at least one oil-soluble ester is chosen from propylene glycol ricinoleate, isopropyl hydroxystearate, tri-isocetyl citrate, di-isostearyl malate, octyl hydroxystearate, tri-isoarachidyl citrate, cetyl lactate, dioctyl malate, octyldodecyl hydroxystearate, di-isostearyl malate, and di-isostearyl lactate.

102. (Withdrawn) The composition according to claim 4, wherein said at least one oil-soluble cationic surfactant is chosen from quaternary ammonium compounds and fatty amines.
